

The SHAREs Blueprint

sharer Renewables.eu: The blueprint for national information hubs (Gateways) is a template created in WordPress that provides the **structure and ideas on how to initiate and design national one-stop-shops for energy communities**. You can view it for free and without registration.

The blueprint includes exemplary information on legal and financial aspects, best practice examples, an FAQ catalogue, step-by-step guides on how to get active, a tool collection, etc. In addition, a communication package for local heroes is provided including white label communication materials (e.g. flyers or factsheets). Tips and tricks to adapt the website to national needs add the final touch to the service. Working with the blueprint is easy: you adapt the structure to national needs and create country-specific content. The website template is almost fully customisable (e.g. number and order of sections in the menu bar, texts and headings).

Sections of the Gateway Blueprint

Get inspired	Get informed	Get equipped	Get members	Get active
				
Learn about best practice examples from all over Europe and get the latest news .	All you need to know to make your energy community a success: basic concepts , financial and funding tips , legal aspects and FAQs .	Find a collection of calculation tools , pictures and guidelines that support you in setting up your project.	Learn about people who could join your energy project and how to reach them. Use our communication activity guides and white label materials .	We can help you get started with your energy community , define your specific project and get in touch with other players in the field.

The blueprint has already been used successfully to establish the following national Gateways, which demonstrate how the structure can be changed and how different the variations can look:

- ▶ Austria: energie-teilen.at
- ▶ Bulgaria: sharer Renewables.bg
- ▶ Croatia: energetske-zajednice.hr
- ▶ Germany: erneuerbare-energie-gemeinschaften.de
- ▶ Georgia: energy4all.ge
- ▶ Hungary: tudaster.kozenergia.hu

Stakeholders interested in setting up a national Gateway in their country using our blueprint are welcome to contact us (see below for contact information). The website is fully transferrable to new stakeholders. You can choose your own URL and are in charge of maintaining and hosting the website.

About SHAREs: The H2020 project supports so-called local heroes in setting up or expanding their energy community and enables them to motivate consumers to participate, even those who do not yet have an affinity to energy matters or are simply unfamiliar with the concept of energy communities. **Project website:** shares-project.eu
